

LOGI miniBot – Instruments in French

Product Code: BOT1208-FR

An engaging educational tool that supports foreign language learning through exploring music and instruments.

The set enables children to recognize, name, and correctly pronounce the names of instruments and sound-related concepts in a foreign language. By combining illustrations, sounds, and words, learning vocabulary becomes natural and engaging.

Children learn to match sounds with illustrations of instruments, and the ability to listen to melodies and check their answers independently boosts self-reliance, confidence, and motivation to learn the language. Combining images, sounds, and words activates multiple senses, increasing the effectiveness of vocabulary acquisition.

The set works perfectly for language lessons, both individual and group, as well as for music classes or after-school clubs. The simple mechanism allows play to start immediately, without any preparation, and repeating and correcting answers reinforces foreign language vocabulary.

It is an attractive and practical teaching aid that makes the world of music a gateway to learning a foreign language from a young age.

To play the game, the LOGI miniBot is required (sold separately – product code: BOT2025).

Set Contents:

- Colorful A3 educational board
- 26 cards with illustrations of instruments and their corresponding names
- Instruction manual in two versions

Users:

- 1-6 children
