

## LOGI miniBot - talking robot – version 2

**Product code:** BOT2025

LOGI miniBOT is an innovative educational tool designed for young explorers, combining play and learning in a truly engaging way. Built around the **STEAM** approach (Science, Technology, Engineering, Arts, Mathematics), it develops key 21st-century skills such as **logical thinking, creativity, focus, mindfulness, and collaboration**.

### Learning through experience

LOGI miniBOT introduces children to nature, maths, foreign languages, art, and early coding through interactive themed sets. Each activity blends attractive illustrations, audio narration, and hands-on interaction with the robot—engaging sight, hearing, and touch. Inspired by the Montessori approach, it encourages independent problem-solving and cause-and-effect thinking.

### Simple to use, full of possibilities

The robot works instantly after switching it on—no screens, apps, or complicated setup. Just turn it on and play begins. With thematic card recognition (card sets sold separately), LOGI miniBOT plays correct word pronunciation in **Polish, English, German, and French**, supporting children's language development through everyday, playful contexts.

### Designed for children's needs

- For children aged **3+**
- Gradual difficulty levels across games
- Ideal for **preschools** and **home learning**
- Safe, durable, and made for intensive use
- Dimensions: **7 x 7 x 6.5 cm**
- Power: **3.7V 700 mAh battery** (included), charging input **5V / 1000 mA**

### Screen-free learning

LOGI miniBOT supports modern education without screen time—safe for young eyes, intuitive to use, and fully engaging. Children learn by doing, building design-thinking skills, creativity, and concentration.

### Why it's worth it

- Supports cognitive and emotional development
- Teaches through play and hands-on experience
- Sparks curiosity about the world
- Helps prepare children for future challenges
- A great choice for teachers and parents looking for effective, modern learning tools

LOGI miniBOT is more than a toy—it's a long-term investment in a child's development that inspires lifelong learning.
