LOGI miniBot

miniBot

LOGI miniBot – I'm Learning German with LOGI
Product code: BOTSET004

A set for children who are taking their first steps in learning a foreign language. By combining the innovative talking **LOGI miniBot** robot with a rich selection of themed educational cards, young learners build vocabulary across many everyday topics in an active, engaging way—fully suited to their developmental stage.

How LOGI games support early education

- Learning through play—**no screens required**

- Developing **language and communication skills**

- Strengthening **memory, focus, and logical thinking**

- Building the foundations of **multilingualism** from an early age

The sets help teachers introduce a foreign language in an interactive, multisensory way that motivates children to explore new words independently.

Available language versions: French, English, and German
Card size: 8 × 10 cm

Robot specifications

- Charging input: **5V / 1000 mA**
